SUMMARY

Strategy and operations leader helping organizations navigate technological and organizational change. Experienced partner to CEOs and executive teams translating emerging technology trends, including AI and workforce transformation, into strategies, operating models, governance approaches, and execution plans. Background spanning consulting, research, innovation programs, and nonprofit strategy. MIT Sloan MBA.

PROFESSIONAL EXPERIENCE

The Bridgespan Group

Boston, MA

Consultant

August 2023 – Present

- Helped build Bridgespan's technology area of expertise, developing frameworks and guidance that help nonprofit and philanthropic leaders respond to technology trends, including AI
- Advised CEOs, executive teams, and philanthropic leaders on organizational strategy, operating models, governance, technology-enabled transformation, and execution
- Led organizational design and talent strategy engagements for organizations with \$12M–\$100M budgets, and developed product strategy and AI governance approaches for a \$70M postsecondary nonprofit, including product development processes, governance structures, and implementation approaches
- Partnered with executive teams and philanthropic leaders to develop scaling strategies, operating models, and governance approaches for a \$600M economic mobility initiative, a \$110M global climate organization, and a higher education funder investing \$150M+ annually
- Co-author of a forthcoming Bridgespan publication on artificial intelligence in the social sector (August 2026)

Harvard Business School

Boston, MA

Research Associate, Project on Managing the Future of Work

February 2020 – August 2023

- Led survey research for *Building from the Bottom Up*, examining how 1,200+ employers can expand economic opportunity; contributed to published report
- Developed case studies and executive insights on organizational adaptation and workforce transformation for HBS's *Managing the Future of Work* platform (1M+ podcast downloads)

Jobs for the Future

Boston, MA

Senior Program Manager

September 2017 – November 2019

- Built data infrastructure tracking \$35M+ in initiatives and partner pipelines, improving visibility into program performance and execution
- Co-led JFF Labs accelerator programs, designing and managing two inaugural cohorts of emerging organizations focused on workforce innovation and partnerships
- Created the organization's first annual impact reporting framework, supporting startup partnerships, leadership decision-making, and communication of outcomes

EDUCATION

MIT Sloan School of Management

Cambridge, MA

Master of Business Administration

June 2016 – June 2018

Johns Hopkins University

Baltimore, MD

Bachelor of Science in Materials Engineering, with Honors
